ABOUT

Backend and data engineer with over 6 years in the industry, passionate about architecting systems that handle real business impact. Experienced across government and enterprise, from building microservices and data pipelines to full-stack development. Always focused on clean architecture and solutions that scale. Actively exploring AI integration and automation to build smarter systems.

EXPERIENCE

Senior Software Engineer, PT Astra International Tbk

Dec 2024 - Present

Jakarta, Indonesia

- Developed the Enterprise Sales Performance & Dealer Management System (OSP) for the automotive industry, a Microservices-based platform serving as the national command center for sales monitoring and analytics
- Developed the Enterprise Sales Performance & Dealer Management System (OSP) for the automotive industry. A Microservices-based platform serving as the national command center for sales monitoring and analytics
- Designed near real-time KPI monitoring dashboards for tracking SPK growth, Delivery Order trends, daily target achievement, vehicle model performance comparison, and after-sales revenue analysis. Empowering management and dealers with data-driven decision-making
- Built lead analytics and sales pipeline management with automated large-volume CSV report exports, delivered directly to users' email without impacting system performance
- Developed a digital PICA (Problem Identification and Corrective Action) workflow for structured dealer issue tracking, documentation, and resolution. Integrated with automated deadline monitoring
- Designed a flexible role-based access control (RBAC) system, ensuring every user level accesses data and reports relevant to their role

Cloud Applications

Software Engineer, PT Astra International Tbk

Mar 2022 - Dec 2023

Jakarta, Indonesia

- Kyma System Approval Discount: Built REST APIs consumed by frontend, created unit tests and Postman collections using JavaScript, Koa.js, Knex.js, Redis, MySQL, GraphQL
- Intelligence Forecasting System (IFS): Developed APIs and frontend dashboard from Figma designs, integrated backend APIs, deployed apps using Docker with TypeScript, Express.js, TypeORM, React.js, MobX, Ant Design
- SAM1: Built new feature feedback system, fixed bugs from SQA, performed API grooming with backend team, integrated APIs using JavaScript, Angular.js
- Odysseus Strapi: POC for Strapi Headless CMS, developed custom APIs and plugins, custom field for role-based selections, modified import-export plugin for base64 image imports, Docker + Azure Blob setup, unit tests using JavaScript, React.js, PostgreSQL, Strapi.js, GraphQL

COMMUNITY & LEADERSHIP

Co-Founder

Web Programming Lampung • 2020 - Present

Co-founded and built a local developer community focused on web technologies, organizing workshops and knowledge-sharing sessions

Founder & Tech Educator

Lampung Dev • Feb 2022 - Present

Creating tech content and tutorials for the Lampung developer community

Founder & Educational Writer

Termux Web ID • 2020 - Present

Founded and manage a platform providing educational articles on Termux, Linux, and web development for Indonesian developers

Workshop Speaker

Universitas Pendidikan Indonesia • Nov 2021

Conducted workshop 'Introduction to Laravel for Website Development'
